PHC rooted in local communities – reaching out and connecting
Inclusive, affordable, accessible

Person centred care

Person, not disease oriented
Tailored to patients needs, goals and abilities

Demand not supply driven

Better health outcomes
More Equity
Lower costs

Integrated Community Oriented Primary Care

- Focusses on the community / population
- Combining data on health of the population with data of patients
- Engaging the community
- Improving health and living circumstances, together with the people of the community
- Examples:
 - Building a playground when too many children are obese
 - Improve housing when many suffer from asthma

Need for data integration on individual and community level for professionals and patients

Lets advocate and work for Strong person centred integrated Primary Care

FOR IF MEDICINE IS REALLY TO ACCOMPLISH
ITS GREAT TASK, IT MUST INTERVENE IN
POLITICAL AND SOCIAL LIFE. IT MUST POINT
OUT THE HINDRANCES THAT IMPEDE THE
NORMAL SOCIAL FUNCTIONING OF VITAL
PROCESSES, AND EFFECT THEIR REMOVAL.
